Recent Clients

We operate as a Technology company

We speak technology fluently! We can speak Java with a Java developer and blockchain encryption with a Crypto developer.

All our team members have technology background which helps immensely to understand clients requirements and match a right candidate.

We build and use innovative tools to find and match expert prospective candidates

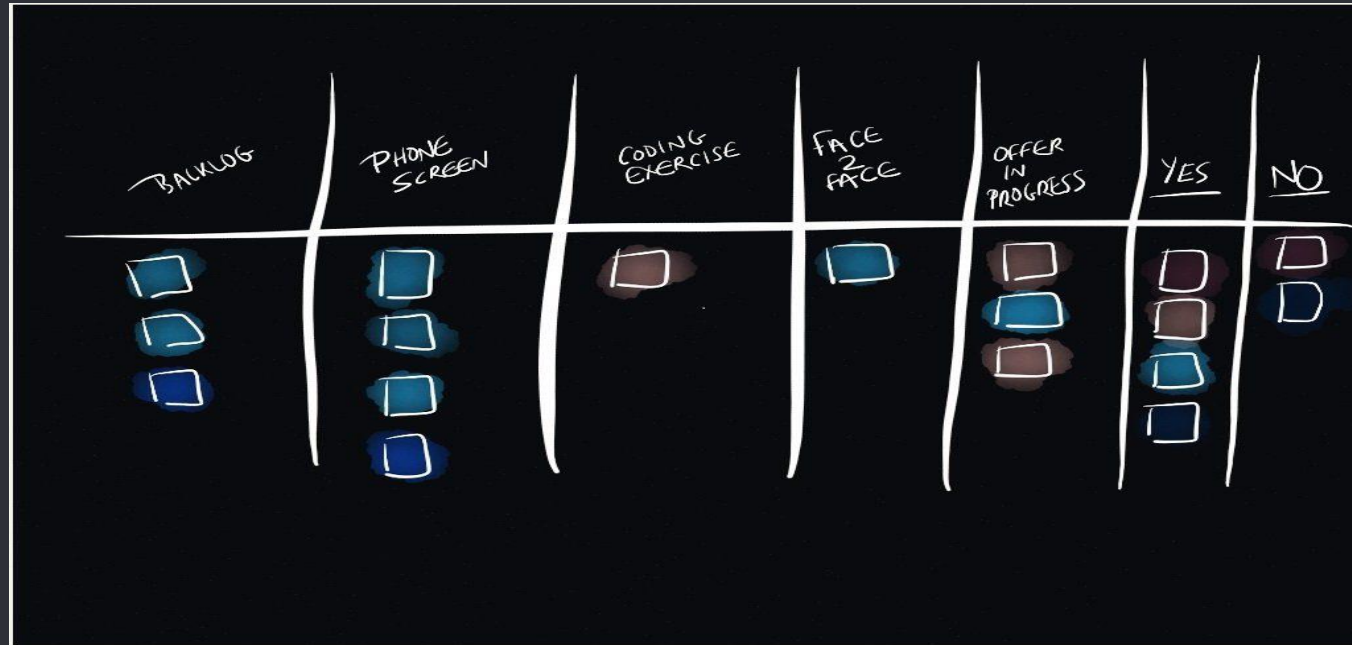

GitRecruit is one of our in-house built tool which scrapes GitHub, StackOverflow, xDA and other technology discussion forums to find best technology candidates

We conduct rigorous technical interviews for every candidates we recommend.

Our Interviewers are current technology professionals working in companies like Amazon, Apple, Tesla, Intel etc.

And we are an Agile company!

Continuous Improvement

Kanban Agile framework enables our team to continuously improve the recruitment methodology and processes by quickly identifying and resolving bottlenecks and inefficiencies.

Reduced Cycle Time

Our success is measured in CYCLE TIME. Using Kanban helps us to uniquely identify cycle time for every task which flows in the pipeline. Our team strives to reduce WIP items by utilizing technology and efficient follow-ups.

● Rhoynar GitRecruit® Tool
